

SEA FOAM SENSORY PLAY

NEW MOTHERS' SUPPORT GROUP

Est. 1994

NMSG

Meet • Support • Play

You will need:

- 1/3 cup water
- 1/3 cup dish soap or Kodomo shampoo
- A few squirts of blue/green liquid watercolors or food colouring
- 1 tbsp cornstarch

To create the foam simply combine the above ingredients with a mixer, hand mixer, or blender. Mix equal parts water and dish soap and then add a small amount of cornstarch as a stabilizer, then your colours to make it blue/green! Throw some aquatic animal toys, seashells, ocean treasure and whatever else you can think of to the sea foam. Let the kids search through the foam for the items in the foam and have fun!

TOP TIP

Note water colours are less likely to stain
